## WW1 Soldier Index – GRG 26/5/4 ABBREVIATIONS LIST

Corps identification has been abbreviated as indicated in the following listing. Double entries, e.g. '10B, 32B', indicate that at some stage the individual transferred from one unit to another. The first figure is the initial posting, the second (in the case of multiple transfers) the final posting. Due to the complexity of corps structures and the inconsistencies of entries on the original 'Information Sheet' attached to each photograph, a number of units have been embraced under one abbreviation. For example 'Navy' refers to the Royal Australian Navy, the Royal Navy and the Merchant Marine. Similarly, 'AMC' includes the Australian Army Medical Corps, Field Ambulance units and the Australian Army Nursing Service. Similar groupings will become apparent to the user of the Index.

Infantry Battalions have been shown as '10B', '16B', '48B' etc. while Light Horse Regiments are shown as '3LH', '9LH' etc.
